

ULTRAFILTRATION

Be a part of the next innovation
in maple sugaring

CDL quality standards and simplified operations

Designed and made for very fine filtration of maple sap, birch sap and concentrate

Eliminates bacteria, yeast and other organic particles from liquids

Improves sap and concentrate preservation time

Research and development

At CDL, we worked hard to make
it reality for producers looking to
expand their market and diversify
their maple and birch product range.

A clear opportunity

We're convinced that ultrafiltration of
sap water will bring the maple and
birch sugaring industry to another level.

**That's why we developed the most
advanced system dedicated to it.**
